## We're Growing to Serve You Better!

February, 2017

### Our new doctors and services.....

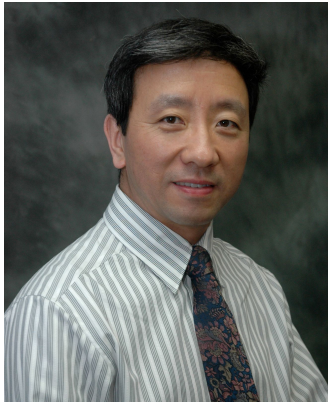

Beacon Dental is expanding our services to better serve our patients. We have recently added two new specialists to the staff. Beginning at the end of January, 2017, Beacon Dental welcomed Dr. David Sandak, a Periodontist, to our office.

Dr. Sandak is a member of the American Academy of Periodontology, the American Dental Association and the Ninth District Dental Society. He is the past President of the White Plains Dental Society and has led a Spear's Study Group, an interdisciplinary Study Group for complex treatment planning. He is also hosting a Westchester Dental Study Group lecture series for dentists and hygienists.

Dr. Sandak has limited his practice to Periodontics and Implant Dentistry since graduating in 1993. He has been trained by the finest practitioners in Periodontics and has vast experience in treating all phases of surgical and non-surgical periodontal therapy, including periodontal plastic

surgery, all phases of implant dentistry including immediate implants with “teeth-in-an-hour, laser dentistry, ridge and sinus augmentation, sleep apnea treatment, and dental extractions.

We are also providing Orthodontics at Beacon Dental. Dr. Guoqiang Guan has joined us to provide orthodontic treatment for both adults and children. Dr. Guan has studied Orthodontics all around the world, receiving degrees and certifications from Peking University in China, Okayama University in Japan, and the University at Buffalo in New York.

Dr. Guan was the Program and Clinical Director of Orthodontics at The University at Buffalo, and is now the Program Director in the Orthodontics Department at The University of Pennsylvania School of Dental Medicine. Dr Guan has more than 20 years of clinical experience in Orthodontics. Dr. Guan is an American Board Certified Orthodontist for adults and children. Beacon Dental is excited and honored to have Dr. Sandak and Dr. Guan join us to better serve the dental needs of our patients here in the Hudson Valley.

### **Our new diagnostic equipment.....**

Beacon Dental also recently added a state-of-the-art, low-dose, 3D imaging X-ray machine. This cutting-edge technology provides our dentists and hygienists with precise, three-dimensional images and crystal clear panoramic images, providing information for exacting diagnoses and treatments. In addition, the cephalogram capability provides the most accurate images available for precision diagnoses

for braces, *Invisalign*, and other orthodontic treatments.
